	CONT	pm	euro	524,41

**LOCATION: 31<sup>st</sup> Civil Engineer Squadron, Operations Flight, Maintenance Engineering Element, Requirements and Optimization/CEOER, Aviano Air Base, Italy**

**MAJOR DUTIES:** The primary purpose of this position is to serve as an Engineering Technician, performing operation and maintenance (O&M) duties in support of a military installation. Reviews Sustainment Management Systems (SMS) data standards, collection and analysis. Ensures SMS reflects an accurately built asset and Real Property Installed Equipment (RPIE) inventory for assigned assets and that the built asset-RPIE relationships are established and reflects a true picture of the current status/health of covered system. Performs Facilities Offices of the Secretary of Defense (OSD) requirement for 100% infrastructure inventory and assessment every 5 years. Utilizes SMS to review Future Years Defense Program (FYDP) +2 investment requirements to repair/sustain systems throughout the asset life-cycle. Evaluates whether the repair/replacement recommendations from SMS are valid by using their knowledge of built assets and its related data. Continuously monitors and assesses the asset condition, performance, accuracy and timely entry of relevant data, and highlights sub-standards performance. Reviews local Key Performance indicators (KPIs) and Targets & Measures (T&Ms) fed by the data collected and links the data to performance measures to support portfolio management. Reviews Operations Flight work force for preventive maintenance (PM). Ensures PM program in the appropriate approved computer system and maintains records in accordance with (IAW) prescriptive requirements. Performs manual validation of PM actions required for every assigned asset and ensures all PM actions are scheduled in approved computer system. Aligns PM material ordering to PM scheduling to optimize just-in-time delivery, minimize required storage space and ensures PM material procurement priority over corrective maintenance. Prepares life-cycle cost, subjective elimination method and man-hour capacity/priority analysis to determine if PM program is optimized. Reviews PM metrics (scheduled vs. completed) at the activity level and performs annual PM analysis on each asset to evaluate the long-term costs associated with PM schedules compared to the replacement costs of not performing maintenance and resulting breakdown. Evaluates and processes technical data related to facilities and utility systems for new construction, renovation and improvements of real property within assigned portfolio. Performs facility assessments to gather data to identify requirements and performance trends. Conducts studies and analysis of asset performance necessary for optimal life-cycle operation of the portfolio using a risk-based approach while working with multiple shops/trades and other engineers in a variety of disciplines or with architects. Assists in defining/prioritizing requirements within the respective portfolio to include identifying and working to resolve issues. Performs contract project reviews and inspections pertaining to respective portfolio. Coordinates with Engineering Flight to gather information on all on-

going/impending project designs and inspections. Maintains a schedule for all upcoming design reviews documents/meetings that involve Operations Flight review/attendance to include: contract specifications, design charrettes, design reviews, materials submitted, red zone meetings/inspections, O&M turn-over meetings/training and warranty inspections. Stores, catalogs, maintains and updates as-built drawings. Maintains copies of all as-built and new designs on computer storage media. Researches original drawings and transcribes information and codes into system. May be required to travel by military and/or civilian aircraft in the performance of official duties. Employee may perform duties at remote sites and work weekends and holidays, as the workload requires. For further information, please contact the Civilian Personnel Office.

**Reference Office of Personnel Management (OPM) Qualification Standards**

**QUALIFICATIONS:** Interested applicants must possess 1 (one) year of specialized experience equivalent to the next lower grade level and which has equipped the applicant with the particular knowledge, skills and abilities to successfully perform the duties of the position to be filled. Specialized experience must be in or related to the position to be filled.

**SUBSTITUTION OF EDUCATION FOR EXPERIENCE:** Applicants must possess a “Laurea di secondo livello” with major study in an appropriate field of engineering, construction, or industrial technology or other related fields. Applicants must submit a copy of their certificate of graduation from a recognized university, listing all the exams and grades.

**Good command of the English and Italian languages is required, subject to testing.**

**Applicants must possess a valid Italian driving license type “B”.**

**APPLICANTS MUST ENSURE THAT ALL QUALIFYING EXPERIENCE IS DOCUMENTED IN THEIR APPLICATION.** Experience which is not on file at the closing date of the announcement will not be considered.

**EQUAL EMPLOYMENT OPPORTUNITY:** All qualified candidates will receive equal consideration for this position without regard to race, color, sex, national origin, religion or physical handicap. The supervisor having jurisdiction over the vacancy will be responsible for selection.

**PLEASE POST ON YOUR BULLETIN BOARD**
